Btech'26 | Computer science and engineering (Artificial Intelligence & Machine learning)

Prayagraj, Uttar Pradesh, India

Summary

I am a student at the UNITED COLLEGE OF ENGINEERING & RESEARCH PRAYAGRAJ with a major in Computer Science and engineering (Artificial Intelligence and Machine learning). I have a passion for computer programming and information technology. I have used computer programming since I was in grade school. This passion has given me the ability to develop programs for a multitude of things, including robots, programming languages, and databases. My other love is AI & ML. I have many plans to implement newer technologies in my life such as cloud computing and managed IT services.

I am open to learning new things and getting involved with new projects that can help me learn or apply all that I have learned throughout my university career.
